**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claim(s) 1-21, 24 and 25 drawn to an adhesive composition

2. Group II claim(s) 22, 23 and 26- 31 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

drawn to a method of use of an adhesive composition

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: because the technical features shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. Note the references of record.

Art Unit: 1711

3. During a telephone conversation with Mr. Jarett K. Abramson on August 21, 2000 election was made with traverse to prosecute the invention of Group I, claims 1-21, 24 and 25. Affirmation of this election must be made by applicant in replying to this Office action. Claims 22, 23 and 26-31 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-21, 24 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hartmann et al, Everaerts et al, Makhoul et al, Gehlsen or EP 0717 091 A2 (disclosed by applicants)

6. Patentees all disclose making an adhesive composition containing an adhesive polymer and resin expandable microspheres. Note col. 2-4 of Gehlsen et al, the abstract of Makhoul et al, col.10 lines 29-44 and 54-62 of Everaerts et al, claims 1 and 2 of Hartmann et al and the abstract of the European patent.

7. It would have been obvious to one skilled in the art as shown by the references of record to foam the expandable microspheres as set forth in the references after the adhesive composition was applied to the chosen surface.
